Why do we do it?

Movement Detection

The majority of security lights outside homes just detect movement

Community Disturbance

Security lights upset neighbors

User Notification

Most products fail to notify users before taking action

ResQ Sensor

How do we do it?

Human Detection

Detect only human movements

Minimal Disturbance

Light only flashes target

Mobile Notification

Send users mobile notification

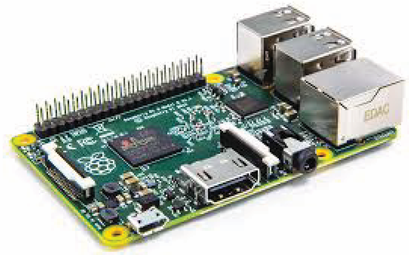
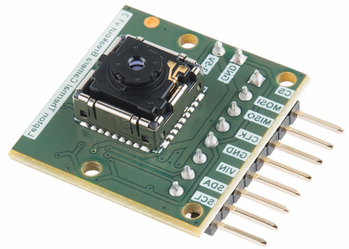
What do we use?

Raspberry Pi 2

- single board computer that does not iclude a built-in hard disk
- relies on a microSD card for booting and long term storage
- includes four USB 2.0 ports, an ethernet port, and the GPIO library





Lepton

- longwave infrared (LWIR) imager sensor with a resolution of 80 (h) x 60 (v) pixels
- able to interact with other electronics
- integrated digital thermal image processing functions, such as noise filters and non-uniformity correction

Servo Seach Light

- Includes 2 servos installed, 1 for pan (180°) and 1 for tilt (90°)
- The searchlight has 3 operating modes, a constant beam, a flashing strobe light or the light off

User Interface

- ResQ Sensor provides both web and app friendly user interface
- Easy for user to access anywhere at anytime
- One button away from making your home safe
