TRES COMMAS VOICE BIOMETRICS

Jonathan Easterman, Carson Holoien, Vince Nicoara, Sasha Shams, Arda Ungun

THE PROBLEM

7/10 customers think authentication is **too slow.**

Authentication takes **30–45 seconds** on average

3/4 customers have failed authenticating.

$15 Billion is estimated spending on authentication in the US annually.

OUR SOLUTION

Secure. Lightweight. Modular. We offer improved security and speed through automated voice authentication, targeting any size call center with our lightweight architecture and ease of deployment. Built on Docker, our solution follows a microservices approach. We implement Microsoft's voice authentication API, though improved or proprietary voice authentication services can be integrated to meet customer needs.
